

Up To
\$9000

*On Tranquility Water-to-Water Unit
and Packaged/Split Combo Purchases!*

TRIPLE-FUNCTION Rebate

That's right... purchase a Tranquility Water-to-Water and Packaged/Split system combination up to 7.5 tons total in place of a competitor's triple-function system and receive up to a \$750 rebate! The rebate will be up to \$900 if the total capacity is 8 tons or more! Simply scroll down to access the rebate form.

Act soon, because this is a limited-time offer.

Tranquility Packaged and Split Systems Series

Available with single or two-stage compressor, the **Tranquility Packaged Series** was designed for both new construction and retrofit applications. The narrow cabinet was designed for easy movement through doorways, crawl spaces and attic access. The **Tranquility 27® Series** utilizes Earthpure® HFC-410A refrigerant along with advanced scroll compressor technology and microprocessor controls allow the Tranquility 27® to operate at the most efficient levels for all weather conditions.

The **Tranquility Split Series** has among the highest efficiency ratings of any geothermal split system in the industry when matched with ClimateMaster Tranquility Indoor Air Handlers or Cased Coils. The Tranquility Split Series easily connect to new or existing fossil fuel and electric furnaces. The indoor split series is ideal for remote applications with a 2nd floor or crawl spaces. The outdoor split series features weather and sound-insulated cabinets for quiet operation.

Tranquility Water-to-Water Series

The **TMW Water-to-Water Series** offers a wide range of units for most any installation with an extended range refrigerant circuit, capable of ground loop (geothermal). The TMW Series can be used for radiant floor heating, snow/ice melt, chilled water for fan coils, potable hot water generation, hot/chilled water for make-up air and many other types of HVAC applications. The **THW Water-to-Water Series** offers an extended range refrigeration circuit, capable of ground loop (geothermal) applications. Unique application-specific controls make the THW Series ideal for hydronic heating and domestic hot water generation. The heating-only refrigeration circuit is optimized for high water temperatures, heating efficiencies, and capacities.
