

Smart Design Starts By Digging Deep.

ClimateMaster Geothermal Heating & Cooling
saves money while adding value.

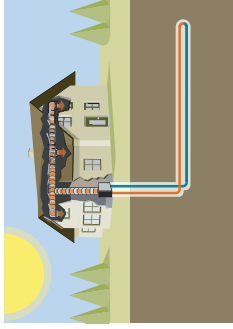

CLIMATEMASTER[®]
Geothermal Heat Pump Systems

Smarter and Sustainable

Create a better design that homeowners will appreciate – include a geothermal heat pump system from ClimateMaster in the plans. Using the earth's stable temperatures to heat and cool homes, geothermal offers a clean, renewable energy source with

no flame, fumes or noisy outside units. Your clients can save up to 80% on their monthly energy bills, and each geothermal system qualifies for 30% federal tax credit. Start creating smarter, sustainable designs with a system from the leader in geothermal heating and cooling – ClimateMaster.
